

Notice to all BB interested parties

17 July 2015

## **Notice of increase of Nameplate Rating to Fairview Production Facility**

On 16 July 2015, the Nameplate Rating or Maximum Daily Quantity (MDW) of Fairview Production Facility was increased to 273 TJ/day by operator Santos Limited (AEMO Operator ID 92). This change is observable in the Standing Capacity (INT 911) report available on the website.

This change is to reflect the inclusion of Fairview Hub Compressor Station 5 in the total production capacity of the Fairview Production Facility, following AEMO's refusal to make an exemption declaration for this facility, published 12 June 2015.

Quantities reported against Fairview Production Facility for Capacity Outlook (INT 922) and Actual Flow (INT 924, INT 925) will also include production from Fairview Compressor Station 5 from 16 July 2015.

Bulletin Board Operator.
