Exemption of BB Storage and Production Facility – AGL Energy Limited

On 4 September, AEMO made an exemption declaration for each of the following storage and production facilities operated by AGL Energy Limited (ABN 74 115 061 375) for purposes of the Natural Gas Services Bulletin Board (Gas BB):

- Silver Springs Storage Facility
- Camden Production Facility

The exemption for the Storage Facility has been made in accordance with clause 150(5)(c):

- The BB storage facility is not, or (in the case of a proposed BB storage facility) will not be, connected to a BB pipeline.

The exemption for the Production Facility has been made in accordance with clause 151(7)(b):

- The nameplate rating of the BB production facility is, or (in the case of a proposed BB production facility) will be, less than 20TJ of natural gas per gas day.
- The Camden production facility also meets the exemption requirement NGR 151 (7)(a) that the natural gas from the BB production facility output does not, or (in the case of a proposed BB production facility) will not, flow (directly or indirectly) into a BB pipeline.

The exemption has the effect that AGL Energy Limited is not required to submit standing or daily data for the storage and production facility.

The exemption declaration for the storage and production facility is effective from the later of the day the storage and production facility is commissioned, and the day the exemption declaration is made for the storage and production facility.

The exemption declaration for each storage and production facility will cease to operate effective immediately if the exemption criteria is no longer satisfied.
